

CRAZY by NATURE

COSMO RED

GISBORNE 2011

NEW ZEALAND WINE

MADE FROM CERTIFIED ORGANIC GRAPES

Millton

An eclectic marriage of three special mouth-watering grape varieties; Malbec, Syrah and Viognier, which grow well in our vineyards, producing a wine showing notes of bitter chocolate and booze-soaked maraschino cherries, with just a hint of spicy cigar box.

"In 1984 they thought we were crazy to grow our grapes organically. We've spent the last twenty-five years proving that they were right! Now, it seems everybody wants to be crazy, and that's just what this planet needs. Crazy by Nature – makes perfect sense."

James Millton has crafted this unique blend of red wine for the enjoyment of many people. An eclectic marriage of three special mouth-watering grape varieties that grow well in our vineyards, producing a wine showing notes of bitter chocolate and booze-soaked maraschino cherries, with just a hint of spicy cigar box.

It is a delicious red wine looking for a good time, with enough texture and chewy tannin to enjoy with venison, roast beef or pink roasted lamb back straps.

All you need is a couple of glasses, several friends and a warm place to sit and wonder. Oh, and keep another bottle handy!

Grown biodynamically using special herbal, mineral and animal preparations and with compassion for the laws of nature. Definitely NO use of herbicide, insecticide, systemic fungicide or soluble fertilizer.

Fined with natural egg whites from our own chooks, so this wine can be enjoyed in moderation by vegetarians as well. Bottled on the property, without filtration, a harmless deposit may form.

Drink between 2012 – 2017.

Wine from Certified Organic and Biodynamic Grapes.
